Why do organisations use teams to complete a project. Choose the **best** answer

- ☐ Teams are more fun because of the social element.
- ☐ It is easier to motivate teams than to motivate an individual.

Correct Answer

- ☐ Individuals have different skillsets required to create the end product.
- ☐ Teams are required in organisations for reporting purposes.
- ☐ People naturally work in teams so there is no choice.

Question 2

0 / 0.5 pts

Kate, Tom, Jones and Sophie are developers on a project. Kate is working on creating a database, specifically the tables and primary keys. Sophie will populate the database when Kate is finished in 7

days' time. Sophie is currently working on some user documentation (non-critical path) while Tom is designing the front-end of the website. Jones has been sick since the beginning of the project. He was scheduled to work on developing some logic necessary for the calculations to display to clients. The time allocated to this logic was 10 days. As this logic is part of the critical path, Sophie has been pulled away from documentation while Jones is off sick. Sophie has been working on the logic and making good progress. After 7 days of Sophie working on this logic, Jones is better and returns to work. Based on the information provided (and you can assume each person has a similar skill-set) - which one of the following statements is **most correct**?

Incorrect Answer

☐

Sophie continues working on the logic and Jones starts working on populating the database as Kate has finished her work on the database.

☐

Jones can start work on the logic and Sophie returns to working on the documentation.

☐

Now that Jones is back, Jones works on the logic and Sophie starts working on populating the database as Kate has finished her work on the database.

☐

Sophie and Jones work on the logic as it is on the critical path and needs to be completed in a timely manner.

☐

Sophie continues working on the logic and Jones starts working on the documentation.

Question 3

0 / 0.5 pts

You are assigned to manage a project that is planned to finish in 6 months and is estimated to cost \$ 60,000 . At the end of the second

month, based on the project Gantt chart, 40% of the work had been reported as completed. The finance department has reported the cost of the project to date as \$35000. Which of the following is **correct**?

☐ The planned value is less than the estimated value.

☐ The planned value is more than the earned value.

Correct Answer

☐

The actual cost is more than the earned value and the planned value

☐

The actual cost does not matter because the earned value is more than the planned value after 2 months.

Tien is 34 years old and works as a handyman and is very talented at building and fixing things. He has decided to ride a bicycle from Melbourne to Sydney in March 2021. Tien has never ridden a bicycle before. He is very excited and wants to use this opportunity to raise money for a charity organisation (BeyondBlue). In order to do this, he has thought about all the tasks that need to be done before he completes the ride in March 2021. These are all the tasks that Tien needs to do.

(A) learn to ride a bicycle

(B) sign up with BeyondBlue charity

(C) create a personal website for raising money (for the BeyondBlue charity) to distribute to friends, so the friends can donate via this website.

(D) promote his donation page on all his social media

(E) print a top with the name of the charity to wear when he is riding his bicycle

(F) learn to fix a bicycle

Which of the following is **correct**?

☐ All the tasks are dependent on each other.

☐ D, E, F can all be done at the same time

☐ There are no dependencies between any of the tasks.

☐ There is a dependency between A and F

Incorrect Answer

☐ C is dependent on B

Hummad is a project manager of the following team,
Praveen -who is very quiet and doesn't speak much during meetings.
Thomas- who does his work very quickly and makes many careless errors.
Emily- who works very slowly and double-checks everything.
Renata- who is very confident and extroverted and everyone likes speaking to.

Hummad wants to motivate his team, which of the following is correct?

☐ Hummad should be a strong cheerleader for his team members.

Incorrect Answer

☐ Hummad should speak to each of the team members and gain an understanding of what is important to them.

☐ Hummad does not need to worry because all his team members are motivated.

☐ As people are only motivated by money, a pay rise will ensure they all complete the project on time and with few errors.

☐ None of the answers

Question 6

0 / 0.5 pts

Which of the following is **incorrect** when talking about cost estimation?

☐

The Putnam-Nordern-Rayleigh curve demonstrates the relationship between cost and time.

☐

The Putnam-Nordern-Rayleigh curve shows the region where increasing effort does not translate to a decrease in time.

Correct Answer

☐

Time, cost and effort are not related.

☐

Number of personnel can be calculated by dividing effort by time.

☐

A person month refers to the time spent by one person working on a task full-time.
