**Question 3****0 / 1 pts**

Which of the following statements about technical reviews is **correct**

- ☐ During a formal review, the reviewers can decide to reject the artefact.
- ☐ A technical review is always done by other team member/s of the development team with the developer. (except an audit which is done by an external team, external to the organisation)

Correct Answer

Incorrect Answer

☐

One of the differences between a walkthrough and a formal review is that during a walkthrough the author leads the process and the reviewers do not need to prepare for the review.

Incorrect Answer

☐

Reviews are done during development to improve the quality of the code.

Incorrect Answer

☐

There are different types of technical reviews including code inspections and walk throughs

#### Question 4

0 / 1 pts

A management review (choose all that are correct)

☐

The software developers will update the Gantt chart so that management can view it.

☐

Involves taking the stakeholders for a walkthrough of the code.

Incorrect Answer

☐

This review will cover whether the current progress and status suggest that changes (for instance resourcing) need to be made.

Incorrect Answer

☐

May include updates to the scope, budget and quality objectives.

Incorrect Answer

☐

A PM will provide management with scheduled updates of the progress and status of the project.

**Question 6****0 / 1 pts**

What is the role of Quality Assurance in Agile?

Incorrect Answer

☐ Continuous integration between development and testing.

☐ After development there is a separate testing done by the agile team in a number of sprints

☐ As there are fast development cycles there is no time for testing.

☐ Agile aims to adapt to changes quickly and minimise time so there is no testing.

Incorrect Answer

☐ Testing is done in each sprint.
