UCo is a software development company that has been in business for 1 year. They have software project planning and requirements management. They also offer training programs and are considering the organisation processes. Which level of the capability maturity model is UCo? Please choose the **best** option.

Incorrect Answer

☐ Level 1 as the company has only been in existence for 1 year

☐ Level 2 because they have software project planning and requirements management, however moving towards level 3 because they are starting to think about the processes and improving software development processes overall..

☐ Level 2 because they are in their second year of business.

☐ Level 3 because they also offer training programs and are considering the organisation processes.

☐ The Capability maturity model cannot be analysed at this stage.

TMCo is a company who has created a fixed price contract with SWConsulting. In this contract, SWConsulting will deliver a working product in 7 months. Which one of the following is **most** correct based on the information about the agreement that you have been given?

☐ SWConsulting can deliver the product in month 8 as it is expected that the project will go overtime as most projects do.

☐ SWConsulting can release the product to TMCo at the end of month 7 without any testing or user acceptance testing as that is what is expected.

Incorrect Answer

☐

SWConsulting may need to pay TMC Co a penalty if errors are found after delivery.

☐

Another company BlueBB asks SWConsulting to create a similar product. As the intellectual property belongs to SWConsulting, SWConsulting can reuse some of the code.

Question 5**0 / 0.5 pts**

The automated trading system (the example used to demonstrate function points in Week 7) has been deployed and now the organisation wants to create a reporting system for brokers to see trading information for their clients. You are a developer working on implementing this add-on. The team is using agile and have the following user story that they are implementing in this sprint.

User story: As an broker, I want to view the report of my customer based on the financial details provided.

This is the structure of an acceptance criteria

“Scenario: (explain scenario). Given (how things begin), when (action taken), then (outcome of taking action).”

Which of the following would be acceptance criteria (pick **all** that are correct)

Incorrect Answer

☐

Considering that I want to download a statement, I should be able to choose the client through a search function.

Incorrect Answer

☐

Considering that I want to download a statement, I should be able to download the statement in doc, excel and pdf formats.

Incorrect Answer

☐

Considering that I want to download a statement, I should be able to view the downloaded file when I click on the submit button.

Incorrect Answer

☐

Considering that I want to download a statement, I should be able to save the downloaded file when I click on the save button.

Incorrect Answer

☐

Considering that I want to download a statement, I should be able to choose the date for the statement through a calendar function.
