Question**1 pts**

You are a project manager for a major information systems project using a formal approach. Someone from the quality department comes to see you about a **quality audit of your project**. The team, already under pressure to complete the project as soon as possible, objects to the audit. Based on the information provided- you should explain to the team that the purpose of a quality audit is:

Answer

- ☐ To ensure that the project activities comply with the policies, procedures and processes of the organization or project.
- ☐ To ensure that the requirements are analysed for the business case for the project.
- ☐ To ensure that the customer (client) has organisational processes and standards and document those processes and standards.
- ☐ To ensure that the product backlog is accurate.
- ☐ To ensure that the PM is programming correctly and that the system is written in Python.

Question**1 pts**

You are the program level manager at a medium sized organisation with several project activities underway. Each of these projects has a project manager. You become concerned about one of the projects using a **Formal** approach. Which one of the following should you do to determine if the project is following the procedures and standards of the organisation.

Answer

- ☐ Quality Audit
- ☐ Risk Audit
- ☐ PMP (project management plan)
- ☐ Sprint retrospective
- ☐ Sprint review

Question**1 pts**

To increase the likelihood that an outsourced project is a success; which of the following should be done–

Answer

- ☐ Create a detailed statement of work.
- ☐ Chose the vendor who is the cheapest
- ☐ Move the development team to an offshore location to save money.
- ☐ Ensure there is no contact and communication between the onshore and offshore teams
- ☐ Remove the project manager from the project as they add a layer of complexity which can cause miscommunication between the different teams.

Question

1 pts

fastDNACo, is an emerging private genetic testing company which provides customers with their genome sequence. A member of the public can directly order a saliva test kit online via a web site, and *fastDNACo* emails the results (with some family tree information) back to the customer a few weeks later. This can also be requested by a doctor and in this case, the customer's medical information is included. The software development team works on data analysis and storing the genome sequences. The *fastDNACo* web site displays its core values as providing quality, fast and affordable customer satisfaction. Which of the following statements are correct? More than one statement can be correct.

Answer

☐ A data engineer in the software team doesn't need to think about ethics, that is fastDNA Co's responsibility.

☐ The IT Project Manager of the software team needs to think about ethical implications

☐ Only the testers need to think about ethics as they are responsible for ensuring that product has not bugs and the data given to the customer is correct.

☐ Only the lawyers need to think about ethics as there are legal issues with storing genome sequences

Answer

☐ A data engineer working as part of a software team does need to ensure they are following IT ethical guidelines.

Question

1 pts

Mr Oetimo is considering either using onshore outsourcing or offshore outsourcing. Which of the following statements relating to onshore outsourcing and offshore outsourcing is **false**.

Answer

☐ Both types of offshoring create a major cost saving

☐ Onshore outsourcing generally has less language barriers, facilitating better communication.

☐ Both type of offshoring transfer risk to another organisation

☐ Both type of offshoring can give the organisation access to expertise and technology that may not exist in the organisation

☐ Offshore outsourcing can provide extended support hours due to different time zones.
