Inanswered   ## Question 3   **0 / 0.5 pts**

You are working as the PM on the NHS project where the team is
creating a electronic patient record system for a new hospital. The
project is projected to take 2 years. During the stakeholder analysis,
you identify that all the doctors (as end users) are stakeholders. There
are approximately 500 doctors that work at the hospital. 200 of these
doctors are part-time (a few days a week) or specialists that may only
work there once a month.
In the stakeholder analysis you identify the doctors as having medium-
high interest but low-medium power. You are now putting together the
communication plan. Which of the following is the **best** option for the
communication with the doctors.

○

The doctors should receive a daily update on the progress of the
project.

○

Every month, the PM should ensure that the doctors' email list is current
by sending a test email.

orrect Answer

○

The PM you should contact the head of the doctors and discuss with
him/her what communication is appropriate and the preferred means
and frequency of communication.

○

The doctors should not be involved in the project until the end when
your team can demonstrate the final solution.

○

The doctors should be invited to a weekly meeting to discuss the
project.
